Summary

• Experienced Automation engineer with more than 6 years in software Testing.
• Creating and executing Test Cases, Test Scripts using python and other python/javascript based frameworks.
• Expertise on Web Automation using selenium, cypress.
• Expertise on manual and automation testing.
• Expertise on Robot Framework, pytest and other testing framework.
• Expertise on python and javascript.
• Test Engineer with strong communication, analytical, logical and problem-solving skills.
• Automation experience on Docker, AWS, CI/CD(Jenkins).

Experience

Senior Software Engineer
Hitachi Vantara
Feb 2022 - Present (5 months +)
• Involved in developing python based application using tkinter.
• Automated test case development using python, java.
• Involved in creating poc around kubernetes.
• Involved in developing UI framework using cypress
• Test case creation, triaging

Technology used: Javascript, Cypress, CSS, Java, Python (Programming Language),Xpath, Jenkins, Confluence, JIRA, Gitlab, docker

Senior Software Engineer
Thales Digital Identity and Security (ex Gemalto)
Apr 2021 - Feb 2022 (11 months)
• Responsible for UI testing using cypress framework.
• Developed/Updated System Test Scripts as per the requirements
• Responsible for writing use cases and test cases for the requirement.
• Worked on file system encryption in windows
• Backup/restore automation using python and other python modules.
• Responsible for regression testing for migration of the existing software.
• Responsible for API testing.

Technology used: Cypress, Selenium WebDriver ,Test Automation, Python (Programming Language), CSS, Xpath, Jenkins, Confluence, JIRA, Gitlab

Quality Assurance Engineer

Cognizant

Jun 2019 - Apr 2021 (1 year 11 months)

• Involved in python based framework development.

• Test case development using Selenium WebDriver and Python.

• Strong experience with REST architecture which include RESTful Web Service (Get, Put, Post, Delete, Options along with JSON data parsing) and REST API Testing.

• Administering continuous integration using jenkins.

• Docker container management and creation on cloud infrastructure.

Technology used: Selenium, CSS, Robot Framework, Python (Programming Language),Xpath, Jenkins, Confluence, JIRA, Gitlab, docker

Automation Analyst

Amazon

Oct 2015 - Jun 2019 (3 years 9 months)

• Analyzing the Business Requirements Specification, System Requirements Specification and User Interface Specification documents.

• Developed and executed Test Plans, Test scenarios, Test Cases, Test Scripts for Manual and Automation Testing.

• Hands on experience on extracting data from web pages using Regex, Xpath, CSS Selectors.

• Automation using Python Selenium.

• Writing SQL queries to extract data for analysis.

Technology used: Cascading Style Sheets (CSS) · Regular Expressions · HTML · SQL · XPath · Python (Programming Language)

Education

Technocrats Institute Of Technology

Bachelor of Engineering (B.E.), Information Technology

2011 - 2015

jawahar navodaya vidyalaya,birkhadi

2004 - 2011

Licenses & Certifications

AMCAT Certified Data Processing Specialist - Aspiring Minds

1507558-211

Python - Sololearn
23360393-1073

Javascript - Sololearn
23360393-1024

Skills

Cascading Style Sheets (CSS) • Regular Expressions • Selenium • pytest • Cypress • Selenium
WebDriver • Automation • Test Automation • Java • MySQL
